

WILDERNESS COURSE READING LIST

Any reading you can accomplish before your course will enhance your experience at AMS. The following list is by no means complete nor do we expect anyone to read all these books. They are books we have in our resource library and some we bring into the field with us. We encourage you to browse the titles and see what might interest you in particular and inquire at your local library for availability. Please contact us if you have any difficulty finding any of these titles and we will be happy to assist you.

Alaska Geographic Society, "Native Cultures in Alaska," Vol. 23, No. 2, 1996.
